

Event Technician

All your technical requirements dealt with in one place – make your life easier and your event run smoother.

There are many aspects to consider when organizing and running your event. Allow us to take care of one important part of any event, the technology. We provide experienced and professional event technicians for your events who will stay with you for the duration.

The technician will –

- coordinate with your presenters to organize their slides, presentations, videos etc.
- ensure all presenters are audible in the room using appropriate microphones
- setup and operate any other equipment (some equipment requires specialist operators)
- always consider customer service with equal importance as technology

You can be sure that you will receive the best customer service in the industry.

Present Communications Ltd take pride in getting it right first time, every time. The questions below are used to identify basic requirements for your event and give us a better understanding of your expectations and allow us to better plan and quote on your project.

Where is the live event taking place (inc. venue address & room)?

What is the date of your event?

What is the start and finish time for your event?

How many people will be speaking at your live event?

How many delegates will be in your audience at the live event?

What will be the room layout at the live event?

Please give an overview of any specialist technical requirements.

Will your event be filmed, recorded, webcast etc?

IF YOU HAVE ANY QUERIES, PLEASE CONTACT PRESENT COMMUNICATIONS.
